

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	2
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	Describe the customer and their attributes here
I'm trying to	<i>List their outcome or "job" the care about - what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	<i>Describe what problems or barriers stand in the way – what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	<i>Enter the "root cause" of why the problem or barrier exists – what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	<i>Describe the emotions from the customer's point of view – how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	But	Because	Which makes me feel
A new employee needing a laptop	order a standard laptop through the Service Catalog	it takes many follow-ups and a long time	requests, approvals and tasks are handled manually	Frustrated

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An employee who needs a standard laptop (a new joiner or a user with an old device)	order a standard laptop quickly through the IT Service Catalog	the process involves manual forms, forwarding and repeated follow-ups for approval and status	requests are processed and tracked manually instead of through an automated workflow	Frustrated and anxious about when the laptop will arrive
PS-2	An IT procurement team member who handles laptop requests	process laptop requests accurately and on time	approvals, task creation and notifications are done by hand, which causes errors and delays	there is no automated flow connecting the request, manager approval and procurement task	Overloaded and stressed about missing or wrongly processed orders
