

Project Design Phase

Problem – Solution Fit Template

Date	15 February 2025
Team ID	2
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? i.e. working parents of 3-5 y.o. kids - Employees (new joiners and existing staff) who need a standard laptop - Managers who approve laptop requests - IT procurement team that orders and delivers laptops	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? - Limited IT budget; only standard laptop models allowed - Approval policies must be followed - Dependence on vendor delivery time - Needs portal / internet access	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What pros & cons do these solutions have? - Email / phone requests to IT – simple, but slow and untracked - Manual forms and spreadsheets – familiar, but error-prone - Catalog without automation – visible, but still needs manual follow-up	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? - Request a standard laptop quickly - Get manager approval without chasing - Have procurement done accurately and on time - Problems: manual forms, repeated follow-ups, delays and errors	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? - Request, approval and procurement are separate manual steps - No automated workflow connecting them - No real-time visibility of request status	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? - Employees email or call IT to ask for status - Managers approve through emails or verbally - Procurement tracks orders in spreadsheets	
Focus on J&P, tap into BE, understand RC	3. TRIGGERS TR What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. - A new employee joins and needs a laptop - The current laptop is old or faulty - Seeing colleagues receive laptops faster	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. - Automate the standard laptop order using ServiceNow Flow Designer - Employee submits a Service Catalog request; the flow starts automatically - Flow handles manager approval when required, creates the procurement task and sends notifications - Result: less manual effort, fewer errors and faster fulfilment	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE – What kind of actions do customers take online? Extract online channels from #7 - Submit and track requests on the Service Portal - Approve through email / portal - Receive email notifications	Focus on J&P, tap into BE, understand RC
			8.2 OFFLINE CH What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. - Calling or visiting the IT helpdesk - Talking to the manager for approval - Collecting the laptop in person	
Identify strong TR & EM	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? i.e. lost, insecure > confident, in control - Before: frustrated, anxious and unsure when the laptop will arrive - After: relieved, confident and in control with clear status updates			Extract online & offline CH of BE
