| Project Name  | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks |                                                                                   |

**Model Performance Testing:**

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter     | Values                                                                                                                                                                                                                                                                                                                                                           | Screenshot |
|-------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 1.    | Model Summary | <p>Not applicable. The project has no AI model.</p> <p><b>Solution summary:</b></p> <p>Flow “Standard Laptop Task” (Global, run as System User): Service Catalog trigger &gt; Ask for Approval &gt; If approved: Create Catalog Task (Assignment group Hardware) &gt; Send Email to the requester. The flow is attached to the Standard Laptop catalog item.</p> |            |
| 2.    | Accuracy      | <p>Training Accuracy - Not applicable</p> <p>Validation Accuracy - Not applicable</p> <p>Reason: no model is trained.</p> <p><b>Flow-testing equivalent:</b></p> <p>Task creation and assignment were correct in the tested approved order (TC-1). Approved test order: REQ0010001 &gt; RITM0010001 &gt; SCTASK0010001, Assignment group Hardware.</p>           |            |

| S.No. | Parameter                     | Values                                                                                                                                                                                                                           | Screenshot |
|-------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 3.    | Fine Tunning Result( if Done) | <p>Validation Accuracy - Not applicable. No fine tuning was done because there is no model.</p> <p><b>Flow-testing equivalent:</b></p> <p>Not done. Further checks (rejected order, execution log) are still to be recorded.</p> |            |
