

**Project Development Phase
Model Performance Test**

Date	10 February 2025
Team ID	Team 2
Team Members	1. Akshaya E 2. Akshaya S 3. Akshaya L 4. Allin Kiruba R
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Not applicable. No Power BI report was built; the project uses ServiceNow records instead. Flow-testing equivalent: The records rendered after ordering the Standard Laptop. Approved test order: REQ0010001 > RITM0010001 > SCTASK0010001, Assignment group Hardware.
2.	Data Preprocessing	Not applicable. No data cleaning or transformation was needed. The flow sets the task fields directly. Flow-testing equivalent: Field values configured in the Create Catalog Task action: Short description and Description = "Laptop needs to be configured", Assignment group = Hardware.

S.No.	Parameter	Screenshot / Values
3.	Utilization of Data Filters	Not applicable in the Power BI sense (no slicers or report filters). Flow-testing equivalent: The flow uses an If condition (approval state is Approved) so that a task is created only for approved requests. The Catalog Tasks list on the Requested Item is filtered by Request item = RITM0010001.
4.	DAX Queries Used	Not applicable. No DAX queries were used because Power BI is not part of this project. Flow-testing equivalent: The flow logic is configured visually in Flow Designer (trigger, Ask for Approval, If, Create Catalog Task, Send Email); no query or script was written.
5.	Dashboard design	No of Visualizations / Graphs - 0 No dashboard was built. The design is shown by the Flow Designer flow and the solution architecture diagram in the project documents.
6	Report Design	No of Visualizations / Graphs - 0 No Power BI report was built. Results are recorded as ServiceNow records and test cases (Section 6 of the project report).
