

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

SCENARIO																																																			
Requesting, approving, procuring and receiving a standard laptop through ServiceNow																																																			
Steps	Entice			Enter			Engage			Exit		Extend																																							
What does the person (or group) typically experience?	Need a new laptop A new joiner or an employee needs a standard laptop	Learn about IT portal Employee hears about the Service Catalog from onboarding or the IT helpdesk	Visit Service Catalog Employee logs in to the ServiceNow portal and browses IT hardware	Select standard laptop Employee opens the Standard Laptop request item	Fill in request form Employee enters the model, justification and delivery location	Submit request Employee reviews the details and submits; a request number is generated	Flow is triggered Flow Designer starts automatically and checks if approval is needed	Manager approval Manager receives the approval request and approves or rejects it	Procurement task created A task is created and assigned to the IT procurement team	Order & delivery The laptop is ordered from the vendor, received and delivered	Notification Employee is notified that the request is fulfilled	Request closed Request and tasks are closed automatically	Asset record updated The laptop is recorded as an asset assigned to the employee	Feedback survey Employee is asked to rate the request experience	Future requests Employee reuses the catalog for accessories or replacements																																				
Interactions	HR / onboarding team and manager; office or remote location			IT helpdesk, onboarding email, company intranet			ServiceNow Service Portal in a web browser			Service Catalog – Standard Laptop item			Catalog request form (variables, mandatory fields)			Submit button, confirmation page and email			Flow Designer flow – runs in the system, no manual interaction			Manager's email or approval inbox in the portal			Catalog task in the IT procurement group's queue			Vendor, IT procurement team and delivery location			Email and portal notification			My Requests page showing status Closed Complete			Asset / CMDB record			Survey email or portal survey			ServiceNow Service Portal								
People: Who do they see or talk to? Places: Where are they? Things: What digital touchpoints or physical objects would they use?																																																			
Goals & motivations	Help me get a working laptop quickly			Help me find the right place to ask			Help me find the laptop catalog easily			Help me choose the right standard model			Help me fill the form without confusion			Help me feel sure my request is submitted			Help me avoid waiting for manual processing			Help me get a quick decision			Help me know my request is being worked on			Help me receive my laptop on time			Help me know my request is complete			Help me confirm what I received is correct			Help me see my laptop in my asset list			Help me give feedback easily			Help me request next time with less effort								
At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")																																																			
Positive moments							One place for all IT requests			Standard models make the choice simple						Instant request number and confirmation			No manual forwarding – the flow starts instantly			Approval in one click from email			Tasks are created and assigned automatically						Automatic status notifications			No manual closing of the request			Assets are tracked without extra effort						Faster the second time								
What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?																																																			
Negative moments	Unsure how to request a laptop			Many employees do not know the catalog exists						Not sure which standard model fits their role			Unclear what to write as justification						Approval can be delayed if the manager is unavailable			Procurement team may not see stock levels			Vendor delivery can be delayed			Employee unsure of delivery status in between									Survey fatigue														
What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?																																																			
Areas of opportunity				Add the laptop request link to the onboarding checklist			Add a search bar and a Laptop shortcut on the portal home page			Show a short comparison of the standard models			Pre-fill fields from the user's profile									Add reminders and escalation for pending approvals			Auto-approve standard laptops within a cost limit			Integrate the vendor API for order tracking			Show a live status tracker on the portal									Use a short one-click survey			Send a laptop refresh reminder								
How might we make each step better? What ideas do we have? What have others suggested?
