

Project Design Phase-II

Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

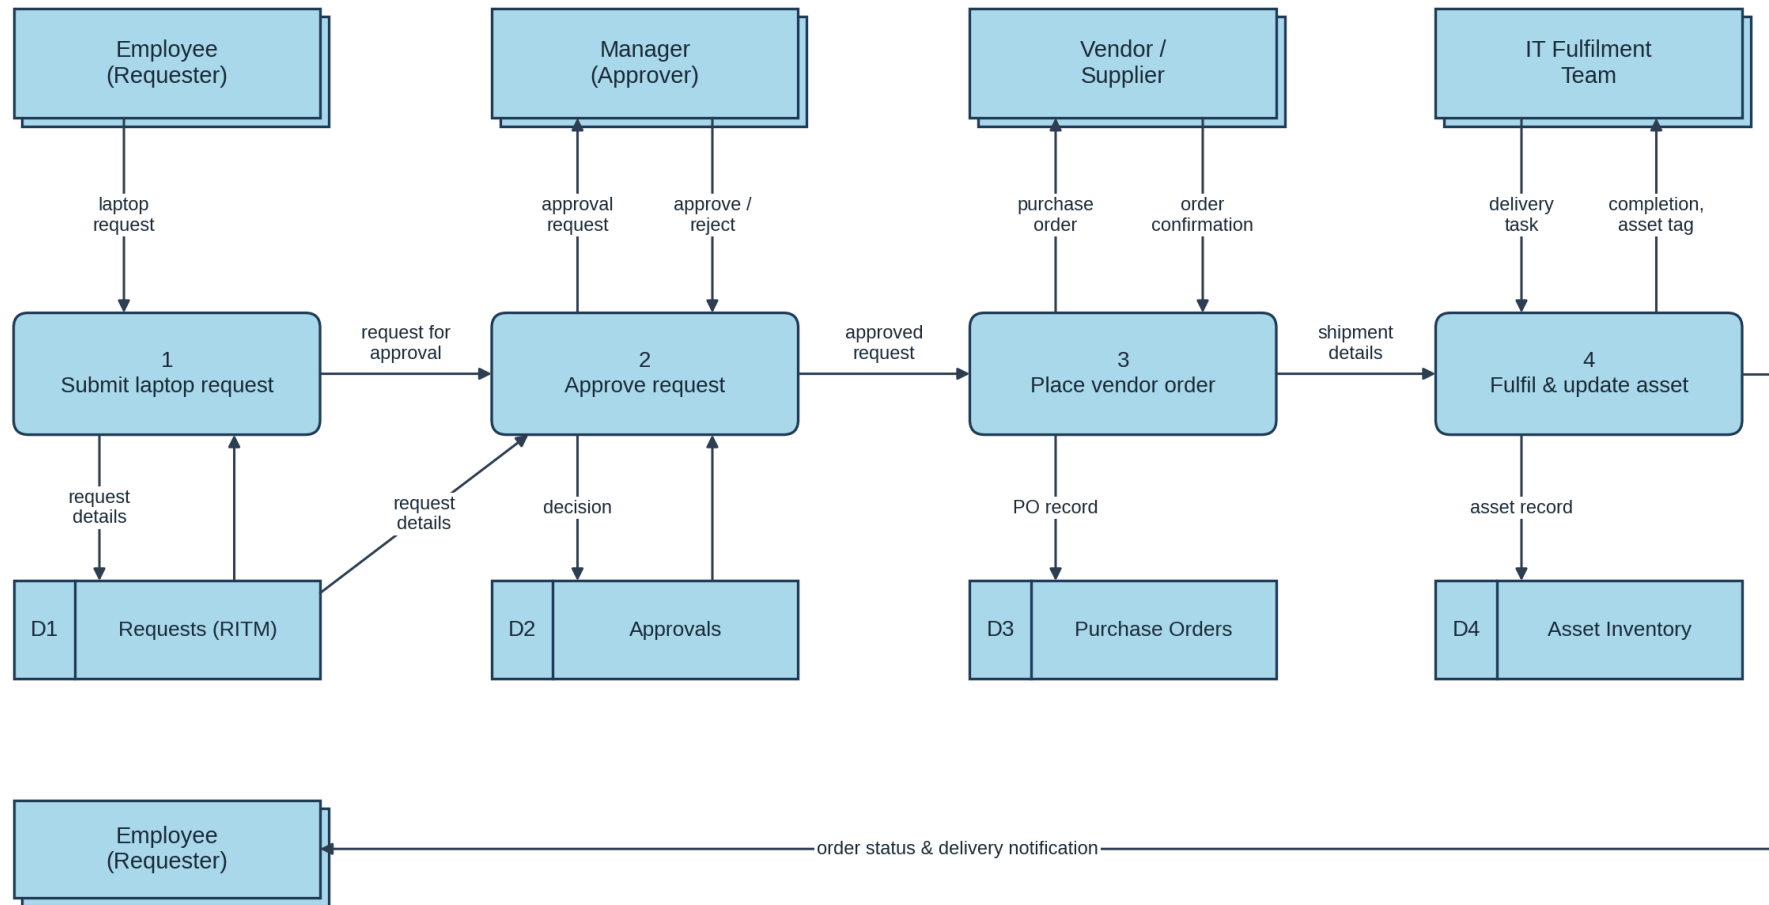

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

1. Employee opens the IT service catalog and submits a standard laptop request.
2. Flow Designer triggers on the new request and sends an approval to the employee's manager.
3. Manager approves or rejects the request; the employee is notified of the decision.
4. On approval, the flow automatically creates a purchase order and sends it to the vendor.
5. Vendor confirms the order; the fulfilment team receives the laptop, delivers it, and the asset record is updated and the employee is notified.

Example: DFD Level 0 (Industry Standard)

User Stories

The below table lists all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee (Requester)	Laptop Request	USN-1	As an employee, I can open the IT service catalog and select a standard laptop model to order.	I can see the standard laptop catalog item with the available models.	High	Sprint-1
		USN-2	As an employee, I can fill in the request form (model, business justification, delivery location) and submit it.	A request (RITM) is created and a request number is shown on screen.	High	Sprint-1
		USN-3	As an employee, I will receive a confirmation email once my request is submitted.	I receive an email containing the request number and details.	High	Sprint-1
	Order Tracking	USN-4	As an employee, I can track the status of my laptop order from the portal.	Status (Pending Approval, Ordered, Delivered) is visible and up to date.	Medium	Sprint-2
		USN-5	As an employee, I will be notified when my laptop is ready or delivered.	I receive a notification with the asset tag and collection / delivery details.	Medium	Sprint-2
Manager (Approver)	Approval	USN-6	As a manager, I will automatically receive an approval request when a team member orders a laptop.	The approval appears in my approvals queue and an email is sent to me.	High	Sprint-1
		USN-7	As a manager, I can approve or reject the request, with comments, from email or the portal.	My decision is recorded; the flow continues if approved or stops if rejected, and the requester is notified.	High	Sprint-1
		USN-8	As a manager, I will receive a reminder if my approval is still pending.	A reminder is sent automatically after the defined waiting period.	Medium	Sprint-2
IT Procurement Specialist (Fulfiller)	Vendor Ordering	USN-9	As a procurement specialist, I want an approved request to automatically create a purchase order with the vendor, so I do not have to enter it manually.	A purchase order is generated with the correct model, quantity and price.	High	Sprint-2
		USN-10	As a procurement specialist, I can view the vendor order number and expected delivery date on the request record.	Vendor confirmation details are stored and visible on the request.	Medium	Sprint-2
	Fulfilment & Asset Update	USN-11	As a fulfilment technician, I will receive a task to prepare and deliver the laptop once it arrives.	A task is assigned to the fulfilment group; closing it completes the request.	High	Sprint-2
		USN-12	As an asset manager, I want the asset record to be created or updated automatically and assigned to the employee.	Asset record shows serial number, asset tag and assigned user.	High	Sprint-3
Administrator	Flow Configuration	USN-13	As an administrator, I can build and maintain the laptop order flow in Flow Designer (trigger, approval, actions) without writing code.	The flow can be tested, activated and edited without code changes.	High	Sprint-1
		USN-14	As an administrator, I can manage the standard laptop models, prices and approval rules in the catalog.	Changes made in the catalog are reflected in the request form immediately.	Medium	Sprint-3
	Monitoring & Reports	USN-15	As an administrator, I will be notified when a flow execution fails.	An alert with the error details is sent and the failed execution is logged.	Medium	Sprint-3
		USN-16	As an administrator, I can view a dashboard of laptop order volumes and turnaround times.	Dashboard shows number of orders by status and average fulfilment time.	Low	Sprint-3
